# A Guide to Accessing Your Pictometry® Imagery

Integrate Pictometry® Imagery into your workflow

Just as every organization will have different imaging needs, they also require solutions that fit into their workflow. Where some organizations solely rely on desktop applications and web-based tools, others work beyond the office and need the on-the-go capabilities of mobile apps.

On-line access anywhere

For quick, easy viewing and analysis of your Pictometry imagery, our web-based platforms are a powerful and secure solution with plenty of functionality.
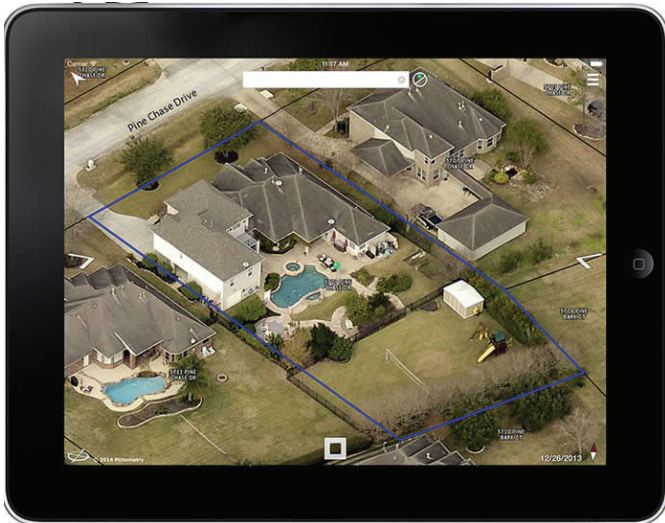

CONNECTExplorer™

CONNECTExplorer™, our secure, web-based platform that combines high-resolution aerial imagery with user's GIS data to create a powerful system that is easily accessible and interactive without leaving the office. CONNECTExplorer includes:

- Accurately search locations quickly and find the property of interest for virtual inspection, evaluation and analysis

- Extract measurements, high-resolution imagery and generate reports for complete end-to-end workflow

- Ability to analyze and integrate customer GIS data

- Measure objects on oblique imagery – especially height

- Overlay parcel boundaries and streets

EAGLEVIEW®

Access on-the-go

The mobile app is ideal for professionals who need property information and access to imagery while out of the office.

CONNECTMobile™

CONNECTMobile™* lets users access Pictometry imagery on an Android™- or iOS-powered mobile device – ideal for situations when a field visit is required. With CONNECTMobile, users can access most of the features from CONNECTExplorer on the go.

Integrations for a seamless workflow

Software integrations give the power of Pictometry images and data integrated into your workflow to keep your day simple and productive.

Integrations

Integrated Pictometry Application offers customers and developers the tools to incorporate Pictometry imagery into desktop and web applications. A network of partner firms have created off the shelf solutions for Assessment, Public Safety, GIS and other commercial applications such as:

- Esri® ArcGIS solutions suite, including ArcGIS Pro

- CAMA systems

- 9-1-1 CAD

*Requires internet connection
